

UV GEL LAMPS

Q: What is the cure time?

A: The watt on your gel lamp is very important in regard to cure time. The following are recommended cure times using Hawley lamps.

- Hawley Alpha™ 6 watt requires 4-6mins
- Hawley Orion™ 9 watt requires 4-5mins
- Hawley Vega™ 36 watt requires 3mins
- Hawley Delta™ 45 watt requires 2-3mins

alpha 6watt

Safe and effective on all gel coatings. Great for students and beginners and is compact enough for Nail Technicians on the go.

orion 9watt

This attractive space saving lamp is ideal for curing all nail gels coatings at an efficient speed. Compact, ideal for salon or mobile Technicians.

vega 36watt

Includes built-in timer (30, 90, 120 & 180 seconds), fan and slide out tray for ease of cleaning and bulb changing. Uses 4 x 9 watt bulbs.

delta 45watt

Includes built in timer (90, 120, 180, 240 & 300 seconds), 2 fans and slide out tray for ease of cleaning and bulb changing. Uses 5 x 9 watt bulbs. This lamp is the ultimate in efficiency for any professional! Versatile enough to use on hands and feet.

H

UV GEL RANGE

Q: Explain some of the characteristics of Hawley Gels?

A: Hawley Gels provide an easy to apply system that is self levelling, has superior adhesion, a high gloss finish and is durable and flexible at any length or shape. The use of colour gel gives a long lasting glamorous look until the clients next appointment.

UV ONE PHASE

Offering superior strength, high gloss finish and excellent adhesion to the natural nail. Self-levelling capabilities make this gel perfect for Nail Technicians of all skill levels.

UV COLOUR

Created in a multitude of colours these high gloss coloured gels are the perfect substitute for nail polish. The self-levelling formula ensures the gels are durable, flexible and easy to apply.

MIRASEAL

The amazing Miraseal UV Gel Top Coat. Requires no cleansing or buffing and does not leave a tacky surface. Great over acrylic or gel for the ultimate shiny finish. Miraseal can also be applied over acrylic nail enhancements.

BUILDER GELS

Our Builder Gels are available in pink, white or One Phase clear. The Pink Builder Gel is a high viscosity gel with amazing shine & durability. The White Builder Gel is our thickest white gel used for tip overlays & free form sculpting. This extra strong gel is self-levelling & gives ultimate control for forming the perfect smile line.

FRENCH GEL

Our fantastic range of French Gels are available in pink or white. Most effective over a base of One Phase Gel.

Hawley® international

COLOUR CHART

Q: Can I put colour gels on natural nails?

A: No, colour gels do not have the same adhesive properties as the Hawley One Phase or Builder Gels. It is therefore recommended to use One Phase or a Builder Gel as a base.
